

Unilever

**MORE THAN 7,000 PALLET POSITIONS  
EQUIPED WITH INTERFLO GRAVITY FLOW AND  
SELECTIVE RACKS AT UNILEVER MORELOS SITE**

UNILEVER built in Cuernavaca Morelos Mexico the most efficient and modern plant to produce aerosol sprays and decided to apply the best solutions in the industry to improve the immediate service to their expo market by implementing through INTERFLO MEXICO Picking and Replenishing Racks for their ingredients and Dynamic Gravity Flow Storage Rack Systems.

UNILEVER with more than 400 brands focused on health and personal care products from nutritionally balanced foods to ice creams, soaps, luxurious shampoos and everyday household care products. Unilever produces world-leading brands including Lipton, Knorr, Dove, Axe, Hellmann's and Omo, alongside trusted local names such as Blue Bad, Pureit an Suave.

UNILEVER selected INTERFLO in order to provide their customers with the best service and best delivery time, Improving their Operations, Warehouse and Material handling operations with INTERFLO MEXICO Picking and Replenishing Rack Systems for their ingredients and Dynamic Gravity Flow Storage Racks Systems for the finished products.

With the INTERFLO Dynamic Rack Systems they also optimized the space of their warehouses, increased the storage capacity and improved the handling of Pallets with FIFO access allowing pickers to have continuous access to product and monitor product shelf life.

With the INTERFLO Dynamic Storage Systems UNILEVER was able to save space, reduce the investment by optimizing their existing warehouse for several SKUs including mixed products for immediate shipping for the traditional and the modern supply channels.

## ADVANTAGES OF THE INTERFLO DYNAMIC GRAVITY FLOW STORAGE PALLET RACKS

- ▶ Pallet Flow racks are perfect for food, beverage and grocery industries looking to pick oldest inventory first. It is an efficient and cost effective storage system for managing perishable and time-sensitive products in high-density storage areas.
- ▶ Pallet flow racks are designed and it is the ideal racking system when you have multiple pallets of the same SKU products.
- ▶ Gravity Flow Pallet Racks provide Automatic FIFO material handling.
- ▶ When combined with carton flow racks and Reverse Flow pallet racking systems, you can create an efficient system that uses gravity to minimize workload and keep picking positions stocked.
- ▶ Suitable for handling plastic, wood and different types of pallets.
- ▶ Reduces time for handling pallets. Immediate access to every type of load and / or SKU. No need to move others.
- ▶ Provides efficient use of floor space and minimizes load and unload times.
- ▶ Increases the storage capacity with efficient use of the floor space reducing and eliminating aisles.
